

SPACE RESCUE CODE PINK

Walkthrough for VERSION 13.0 of October 2025 (No spoilers) (The game updates about every 3 months)

Introduction

Space Rescue is an **adult ‘point & click’-adventure**, where **you play as Keen**; a young mechanic that just landed his first job on a 'Rescue & Relax' Spaceship. And Keen's task is simple; make repairs wherever needed. However along the way, his many attractive crewmates start to fall for him & what usually starts out as a straightforward repairjob, always seems to change into a rather "**sticky**" situation!

Space Rescue's **main gameplay** involves; following dialogs, finding items and using them in the right places to continue the story.

Note; **Space Rescue: Code Pink** is still under development.

With every update, the game-code changes, so **you can't use old save-games** in newer versions of the game.

Instead press **‘start’** in the main menu & **choose the chapter** you last played to get back on track. (hold down **ctrl** to speed up the text).

Basic Gameplay Reminder

(this is a copy of the game-guide in the main menu)

Search & Interact

Move your mouse around the screen. If you found something, the mouse-cursor will change shape depending on what it is. If you then click that object or person, you will interact with it.

(Phone user? Slide your finger!)

Are you playing SRCP on your phone? Then *slide* your finger over the screen to find things. If you found something, just lift up your finger & you will automatically interact with it. This way of playing is easier than trying to tap every spot on the screen.

Move around the ship

You can move from room to room. Move your mouse over the screen until your mouse-cursor will change into an 'exit icon'. Then click, to go the next room or the ship-map.

(ship-map)

Not all rooms are connected. Use the ship-map, to go directly to a room. If rooms can be accessed, they will be highlighted when you move your mouse over them. More rooms will become available as you continue your adventure.

Dialogs

While talking to characters, you will gradually unlock more talking points in the dialog-menu. Be sure to talk about everything to progress the game.

(Requests)

Dialogs often end with a request. This request often means you have to do something, before the dialog will continue; *like finding an item, or making a repair.*

(Reminders)

If you forgot what to do, head back to the person you talked to; and they will give you a reminder about what to do.

Finding items & Inventory

Move your mouse over the screen until your mouse-cursor will change into a 'hand'. *Click* to pick

up the item; Keen will automatically put items in his toolbox / your Inventory. You can access your Inventory by *clicking* on it's icon in the top left corner of the screen. Click again to exit.

(Item hints)

Once in the Inventory, move your mouse over the items to read their names. Or click on an item to get a hint about what to do with that item.

Use the blue triangle buttons in the toolbox, to go to the next page of items.

Printing items

Keen has a 3-D printer inside the desk in his room. Here you can print items (that cannot be found). Printing items requires minerals.

Collecting minerals -mini game

Play the mini-game to collect 'minerals', these are required to use your printer.

You find the mini-game by clicking the top window in the Shuttlebay.

The game has a cheat option, that will appear in the dialog-menu after your first try.

Making repairs

Move your mouse over the screen until your mouse-cursor will change into a 'wrench'. This indicates you can make a repair.

If you click on this object, Keen will tell you what items you need to collect to make that repair.

If you have *all* the required items, Keen will start the repair automatically – and used items will be removed from your inventory.

Mini Games

(In the future) Space Rescue will have more mini-games with their own rules. You will always find the rules in the dialog-menu preceding the mini-games.

Some general advice to make things easier...

Now before you dive in the walkthrough, know that **the game itself already gives quite a few hints**. So if you feel stuck, remember...

- Talk to the characters; if they requested something, their **last dialog option is always a reminder** of what you need to do.
- Click on the items in your inventory; **story-items always contain a hint** of what you need to do with them.
- When someone tells you to come back **another day**, pass through Keens room.
- Also, when a complete storyline ends; you might need to walk around the ship a bit to trigger a new chapter.

If these hints don't help, then read the **walkthrough** below. Or, when this document isn't updated yet; ask the community for help.

Well,

I hope this will help you on your way!

Enjoy the game!

How the Walkthrough is organized

In this game, **each girl has a story of her own**. And to complete the game, you need to play through all the stories.

To do so, you just have to read the dialogs and complete each requests that a **Character** might have. Often that means you have to find an **Item** and bring that item back to the character, or the specified **Location**.

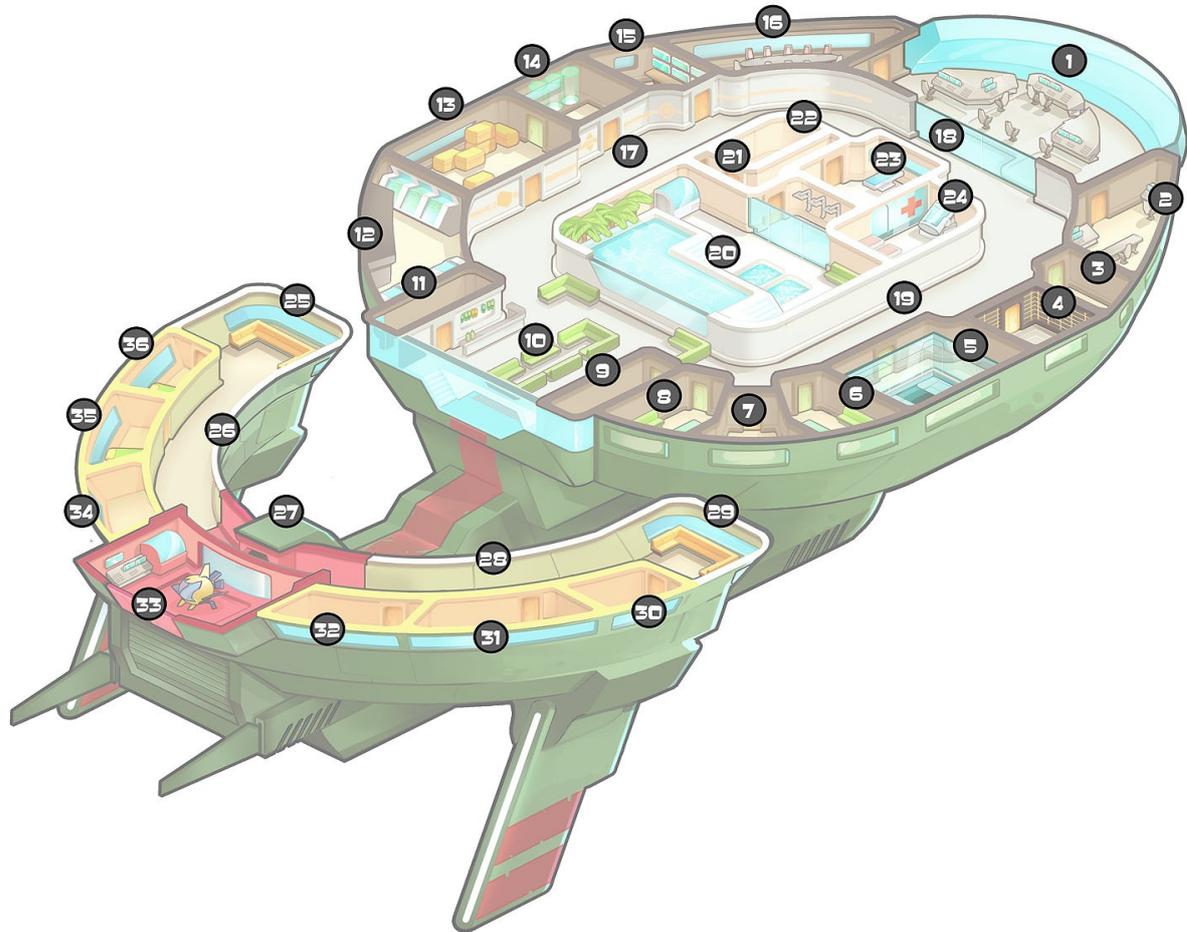

While playing you can simply jump into any available storyline and pick up anything you find.

But for the clarity of this walkthrough, the storylines are listed per girl.

5.2 The Power Crane game (find the shuttle-parts)

When in the **Power Crane**, choose to start the game.

- You need to move all the **light-blocks** to the right side of the screen, behind the dotted lines.
- To do so, you also need to move around the **darker-blocks** in the middle. Note, these **darker-blocks** can **not** be moved past the dotted lines.
- You have 100 moves to do this, if you fail you have to retry. It takes about 50 moves to complete the puzzle.
- (HINT) Key to the solution is to occasionally move the long dark blocks in the space directly adjacent to the dotted lines on the right.

If you successfully completed the Power Crane puzzle, you found the parts you needed.

Now you can optionally replay the puzzle if you like.

Choose 'leave' at the **Power Crane** -menu to return to the **Junkyard Hull**.

5.3 Buy the shuttle-parts from Valerie

When in the **Junkyard Hull**, click on the exit at the bottom to go to the **Junk Repairbay**.
